

Blinds & shutters BUYERS' GUIDE

ENTRY
FORM
2023 Edition

The Blinds & Shutters Buyers' Guide is the ultimate reference source for manufacturers, retailers and specifiers (such as architects and designers). It has been specifically designed to identify and source all types of equipment, components and finished products within the blinds, awnings, grilles and shutters market. We are now compiling the 2023 edition, for publication early December.

To make it as useful as possible for our readers - your potential customers - this unique reference source contains various useful sections:

A-Z Section: Lists the addresses and details of manufacturers and suppliers of products in the field.

Buyers' Guide section: Lists your company name under the products you manufacture or supply. When a reader wishes to locate suppliers of a certain product, they look for the category heading within this section, which will give the names of the companies dealing with this product. The A-Z Section will then provide the contact details.

Trade Names Section: Provides a guide to brand or trade names, giving a brief description of the branded product, and the name of the supplier.

Editorial Section: Providing topical and relevant information.

Glossary Section: Description of terms and products used in the industry.

Relevant Standards Section: Guide to current and relevant BSI standards.

To ensure that your company and products are represented in this invaluable and unique publication, **please complete and return this form without delay** via email to b.williams@turretgroup.com.

or post to: Barbara Williams, Turret Group Ltd

Cardinal Point, Park Road, Rickmansworth, Herts WD3 1RE.

All basic listings are free of charge, although several ways of enhancing your marketing message (eg: by adding your company logo to your basic A-Z entry, or by having a panel printed with your logo and full contact details within the Buyers' Guide section), are given within these pages - see how you can make your entry stand out from those of your competitors.
